

---

### Programs

This line starts USER to use Batch processing on a file called FILENAME	>CALL USER("DSK1.FILENAME")
Line 100 is same as above. but within a program.	>100 CALL USER("DSK1.FILE")
Line 100 variable A\$ equals a String-variable path name. Line 110 starts USER to use Batch processing on A\$	>100 A\$="DSK.VOLUME.FILE"   >110 CALL USER(A\$)
Save this program as LOAD.	>100 CALL USER("DSK1.BATCH")

Here is an example DV80 file you save with the name BATCH.

```
! BATCH file for using  
NEW and CALL FILES and RUN. cr  
cr  
CALL XB("DSK1.A-PROGRAM",#) cr  
! The # is 0 to 15 (see FILES)
```

The above DV80 file uses cr to mean Carriage Return. And # is for the number of files you wish open. A-PROGRAM is the name of the XB program that needs a certain number of files open.

### Options

To many to list out. See BATCH for demo.
